RS-SKIVER45

Put down the knife. Skive it.

Carbon-fibre water tank keeps the blade wet for smooth, anti-friction cutting

Hand-skiving rubber is slow, and every edge depends on a steady hand. The RS-Skiver45 is a powered skiver that cuts clean, uniform bevels — fast, easy, and the same on the last cut as the first.

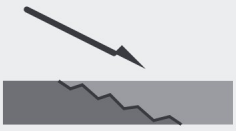

1,800
rpm, 4-pole motor

13.7 Nm
max torque

1 ½"
max cut thickness

30·45·90°
bevel attachments

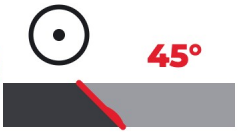

Ships as a complete kit: Makita DDA350Z 18V LXT tool · 2 × 18V 4.0Ah batteries · charger · bevel base plates · hard case

THE HAND KNIFE

Slow, tiring passes
Angle drifts cut to cut
Finish depends on the operator

VS

THE RS-SKIVER45
